Clang Formatter

Clang Formatter

by **jayands** » Tue Aug 09, 2016 3:35 pm

I know that we have the setup for using it in the git repo, but would it be okay to do a cosmetic commit in which it's just run over all the code? I didn't want to check in such a "massive" overhaul that affects the `src` directory so heavily and not inform anybody that it was happening or get permission beforehand.
